

THE 13TH HIKO SENTAI

*According to the relevant technical report, the motif on MN 1023 (see lower left-hand enlargement) had the white arrow over-painted in blue, indicating this Toryu had recently been transferred from the No. 1 Chutai to the headquarters detachment. The original 13<sup>th</sup> Sentai motif as used on the unit's Ki-27s in 1942 is seen on the upper left-hand enlargement.*

*Another Toryu camouflage scheme is showcased on this No. 1 Chutai wrecked Toryu at Boram with the tail circled.*
